

Need a staging solution for your next outdoor event?
We create hire experiences that are fast, affordable
and professional for every customer

TRUCK STAGE

Packages from \$1000+GST

Our truck stage is the smallest in our fleet, and the perfect addition to any outdoor event needing a fast and affordable setup.

PACKAGE A
\$1200+GST
5M X 6M = 30M2

PACKAGE B
\$1000+GST
5M X 4M = 20M2

STAGE SPECIFICATIONS

- The truck stage takes 1-1.5hrs to build, and 60 mins to packdown. Additional time will be required if adding production and/or backline.
- The site footprint required for setup is 9.5m length x 9.5m depth x 4m height. This creates a stage of 6m x 5m, 30m2.
- Adequate access to get the truck to its desired position must be suitable for a truck weighing up to 10T to access. A site map showing the access route is required for all setups. Should the truck get stuck, the cost to rescue it will be passed onto the client.
- The stage surface is made from prolyte stage panels with a loading capacity of 750kg/m2.
- On completion of the build, the stage height is between 900mm - 1200mm depending on site foundation, and comes complete with a black stage skirt and two sets of stairs with handrails.
- The truck stage has limited protection from weather via a gullwing roof. The back is 1.8m high, and the gullwing opens up to 2.6m above stage.
- The back wheels of the truck must be at the highest point of the site, as two hydraulic arms will assist in levelling stage from front of truck to ensure the stage is level.
- The stage can only be built out from the driver's side. See photos for illustration.
- The surface of which the truck stage is built cannot have a slope of more than 300mm tolerance from front to back - side to side.
- The truck stage has been certified to handle wind gusts of up to 50kph with associated banners fixed. Should site conditions / weather forecast exceed gusts of 50kph, discussions will be held with the client pre-event regarding safe solutions.
- Additional staging can be added to create a larger stage space. Please enquire for a price on application.
- Prices noted above are for Auckland delivery only, with additional transport charged for locations beyond.

BANNER SPECIFICATIONS

Custom made banners can be applied to the truck stage to help brand the stage maximising value for all stakeholders involved with your event

Top Banner

1000mm high x 5250mm wide

Bottom Banner

1840mm high x 4980mm wide

We recommend the top and bottom banner is a PVC blackout welded with eyelets (approx. every 300mm) on all sides.

When sending artwork to your local printer, save as a press quality pdf at 10% of actual size.

Add 500mm bleed around artwork and convert all text to outlines.

Recommended supplier
www.benefitz.co.nz

Recommended one week minimum turn around.

Banner must be supplied on arrival to site.

"We booked Mobile Stage Co for our 'B' stage as part of ZM's Float Festival. The team were great to deal with and helped us create a great vibe. They were proactive at integrating with our site setup and take health & safety seriously.

On top of that, our sponsors JBL were impressed with how effective their branded banners were based on the specs supplied by MSC. If you're looking for a simple, cost effective staging solution for your event, these are definitely your guys."
